Dear Valued Customer,

Thank you for choosing Laverell's for your special event. Laverell's would like to make sure that your event is as enjoyable as possible. Please take time to visit our website at laverells.com to check out our restroom trailer inside and out. I have also provided some important tips such as trailer specs, trailer placement, power and water usage.

When deciding where to place Laverell's Restroom Trailer, please keep these points in mind.

- Put the trailer in a location that is level.
- The trailer is about 17 feet long, about 16 feet wide and 12 feet high. Suggestion: Look for a location that will accommodate a small camp trailer.
- A 2 ton truck will be used to haul the trailer in and out. Please make sure that the trailer is in an open location that will allow for servicing, unhooking, and hook-up.
- Other considerations would be wet areas, lawn tracks, sprinkler systems, fences and overhead problems such as power lines and entrance gates.

Power and Water Requirements:

- A 120 volt for electricity and about 30 amp circuits will be needed. A 100 foot power cord is standard. If a longer distance is needed, please let us know ahead of time.
- A 5,000 watt (5kw) generator is also available if there is no power source accessible.
- Water will take any garden hose to water source. 200 feet of hose is standard, a good working well is needed.
- The unit can have its own water sources if there is no water source available.
- Pumping waste water tank is supplied by Laverell's.
- All toilet supplies i.e. soap, paper towels and toilet paper are supplied by Laverell's.

Once you accept the bid, please fill out any highlighted areas and sign the contract. Please send all paperwork and deposit check back to us. Laverell's will call and reconfirm your order within two weeks prior to your special event. Please try to let us know of any changes at least three weeks prior to your event. Laverell's will keep this file in case any changes arise. Again, thank you for choosing Laverell's Restroom Trailer Rentals. Please do not hesitate to call us with any questions or details.

Sincerely,

Frank
